Github: [@helloimiskra](#)

Medium: [@helloimiskra](#)

EXPERIENCE

English Instructor	South Korea
IEEA Global Campus	05/2018 - 02/2020
Korea POLY School - Gimpo	12/2017 - 03/2018
Benjamin English Club	11/2015 - 11/2017

- Increased advanced students' academic PEAP scores by 2 levels in 1 academic year
- Analyzed students' needs and designed and managed 4-5+ different projects/curriculums at a time
- Collaborated with multinational teams and applied new information to problem solve routine issues in long-term projects
- Used cultural awareness and nuance while interacting in multicultural business environments

EDUCATION

Flatiron School **04/2019 - 07/2020**
Part-Time Online Immersive
Full Stack Web Development
Ruby on Rails and JavaScript program

Mount Holyoke College **05/2015**
South Hadley, MA
Bachelor of Arts, International Relations
Focus: Peace & Security Studies
Minor: Asian Studies

PROFILE

Full Stack Software Engineer with experience in Ruby-on-Rails and JavaScript-based programming. I have experience working remotely and independently in fast-paced and changing environments while adapting to linguistic and time challenges.

TECHNICAL SKILLS

Ruby, Rails, React/Redux, PostgreSQL, SQLite, Sinatra, HTML5/CSS/JavaScript, Bootstrap

TECHNICAL PROJECTS

Seventy Five Hard Tracker - [Github](#) | [Demo](#)

An app for simple tracking of days while completing Andy Frisella's #75HARD challenge

- Built with a Rails API with a React/Redux frontend
- Integrated Redux-Thunk so dispatched actions can be used to interact with API asynchronously
- Created and maintained a SQLite database for backend JSON creation and modification

Pet Task Tracker - [Github](#) | [Demo](#)

A simple SPA for recording and managing a pet's daily events and related tasks.

- Utilized Rails' API framework with JavaScript for the user-facing frontend
- Used JavaScript's Fetch API for RESTful data manipulation with the backend
- Coded event handlers for user-driven DOM manipulation

Adopt-a-Pup - [Github](#) | [Demo](#)

A Rails app intended to connect pet shelters and potential adopters together.

- Harnessed the omniAuth gem for third-party sign up and log in
- Created user-specific cookies and sessions to maintain user confidentiality
- Authenticated and authorized users through the bcrypt gem
